WIND WEATHER

North of Sandy Hook, strong north-
west diminishing, weather fair Wednes-
day.

Sandy Hook to Hatteras, strong north-
west diminishing and weather fair Wed-
nesday.

Conditions

Low-pressure prevails off the Atlantic
coast with disturbances having their cen-
ters near Nova Scotia and to the north-
westward of Bermuda. Both of
these disturbances are moving rapidly
northward. They have been at-
tended by gales along the Atlantic coast
and by local snows in the Middle At-
lantic and New England states.

The pressure has risen over all in-
terior districts east of the Mississippi
river. Cold weather prevailed during
Tuesday east of the Mississippi river.

In the New England states the weather
will be fair Wednesday and cloudy and
stormy Thursday.

Storm warnings remain displayed on
the Atlantic coast at and north of Cape
Hatteras.

Forecast

For Southern New England: Fair
Wednesday; Thursday cloudy and warm-
er.

BURCHMAN LOSES \$10,000 SUIT
AGAINST NORWICH FOR SON'S DEATH

Judge L. P. Waldo Marvin of the su-
perior court handed down a decision
here Tuesday for the town of Norwich in
the suit brought against the town for
\$10,000 damages for the death of 9-year
old Isadore Burchman. The suit was
brought by the boy's father, Hyman
Burchman, of West Main street near Ma-
ple street.

The suit was tried in the superior
court here about two weeks ago when
Judge H. H. Pettie and Arthur M.
Brown attorneys for the town and Thom-
as H. Shields for the plaintiff.

In his memorandum of decision, Judge
Marvin said:

This action is for damages arising
from the death of Isadore Burchman, son
of Hyman Burchman, who was killed by
a car on West Main street, in the town
of Norwich, July 7, 1915, when he was
struck by an automobile operated by
Clement Joubert, which collision plain-
tiff claimed to have been due to the
negligence of the town.

It was practically admitted that the
street in question was bearing an extra
heavy traffic because it was being used
as a detour to New London, while re-
pairs were being made in Thames or
West Thames street, leading south from
the center of Norwich along the west
shore of the Thames river. It was al-
so proved that this traffic resulted in
swerving "booths" in the way of the
road macadam of the highway, and that
the selection of the town of Norwich
was aware of the fact and fre-
quently, while the detour was in use,
caused these booths to be filled up,
and used for that purpose tarvis, when
it was available.

On the day in question Isadore Burch-
man, nine years old, in good health, a
son of Hyman and Lena Burchman. He
had a bicycle of his own for some
time and knew how to ride and operate
it, but on the day in question he and
another boy were taking turns riding
a machine sired girl's bicycle back and
forth on West Main street, between a
home occupied by a family of the name
of Burchman and Dunham street. The
boy was so high that Isadore was un-
able to reach the pedals when sitting on
the seat, and therefore, rode standing
on the pedals. He was also unfamiliar

with steering a girl's bicycle and be-
cause of this fact, and the fact that he
was obliged to ride standing on the
pedals, he was unable to turn the bicycle
around, and wobbled considerably in
riding the wheel in one direction over
the highway in its then condition.

Joubert was returning from a cem-
etery driving an automobile, having six
passengers whom he had taken to the
cemetery and was returning.

The testimony as to just how the ac-
cident happened is conflicting, but it
seems to the court that the evidence
shows that the boy and the automo-
bile were both proceeding in an easterly
direction the boy in advance, and that
both were well over to their right hand
side of the road. It would seem that
under these circumstances, the road be-
ing clear and the bright daylight, the
automobile should have turned to the
left sufficiently to clear the boy, how-
ever much he was "wobbling" in that
as it may, the court is unable to find
any sufficient evidence to justify the
conclusion that any hole in the road was
the proximate cause of what hap-
pened.

It is the settled law in this state that
in an action such as this the plaintiff
bearing the burden of proof of estab-
lishing, each of the three propositions, i.
e.: (1) That the highway was in a
defective condition; (2) that the injury
was caused by this defect; and (3) that
the plaintiff's own negligence did not con-
tribute to the injury. If the result of
the evidence of the plaintiff "or a third
person, is also a proximate cause he
cannot say that he was injured by the
defect; he can only truthfully say that
he was injured by his own or another's
carelessness and the defect.

It was not necessary for the plaintiff
to exclude every possibility that the ac-
cident may have happened through some
other cause than a defective highway,
but he was bound to introduce sufficient
evidence to remove this question from
the realm of speculation and conjecture.

It seems to the court that in the
pending case the plaintiff has failed to
meet this requirement, and for this rea-
son (aside from others urged upon the
consideration of the court) judgment is
ordered for the defendant.

NOVEL LIGHTING CONFERENCE AND
DEMONSTRATION COMING HERE

A unique industrial and commercial
lighting conference and demonstration
will be given in this city on Dec. 6th and
will show local merchants and industrial
men the advantages of new systems of
lighting. Exhaustive tests have shown
that proper illumination is a big factor in
increasing manufacturing production,
and that the use of light is an impor-
tant element in the commercial lines in
increasing sales.

The conference and demonstration has
been arranged by General Manager
C. W. Taggart of the gas and electrical
department with the Edison Lamp Works
of the General Electric company, and
will be given at the Wagonway hotel.
The talks and demonstrations take place
in a special portable room, formed from
a framework of iron piping over the top
and sides of which a canvas ceiling and
walls have been placed. In this room
within a room, the "indoor tent" has
been called, the audience sits and, as if
by magic, a system of lighting are shown
by means of different kinds of lights and
reflectors hung close to the canvas ceiling,
each one of the audience is invited to
test the lighting intensities through a de-
vice known as the foot candle meter.

Lecturers from the Edison lamp works
will be present for the last Sunday of
the month. The portable room will seat
about 125 people and is a time saving
device.

Unusual interest is being displayed in
this traveling industrial and commercial
lighting show. There are at present two
of them on the road, and an extensive
tour has been outlined. Representative
industrial managers, business men, and
civil and business organizations are co-
operating in this educational movement
for better lighting and have assigned
their intention of being present at the
demonstration.
